# **Learn How Webmasters Earn With AdSense Following Their Monthly Earnings Reports**

If you would like to learn how much you can make with Google AdSense or whether your present revenue is appropriate or not, the simplest way is to put side by side the online earnings of other bloggers or webmasters, their visitors statistics and find out how they blend the ads into their websites. See the table containing [exact adsense earnings](#) of other bloggers. Now, what I have learned from this table.

Most likely, you already know that AdSense revenue depends on various factors. But the most significant is how many visitors your website or blog gets every day. If your website does not get visitors, you are not going to earn anything. Period. That's why those "get-rich-quick" schemes do not help you to succeed. They teach you how to create a website, how to find proper keywords for your website and suggest you ready-to-use AdSense templates. But most of them do not teach you how to go for visitors. There are almost 5 billion websites out there. Why your website should be the one that will be placed on the top of the search engines? There are millions of people who purchase these guides to earn money quickly and they see identical suggestions for the keywords. However, the most of those websites do not have any visitors and do not earn anything.

First rule: reveal the number of the visitors to your website and I will try to forecast how much money you can make.

The next factor is the subject of your website. There are rich and poor topics, and even subjects that will not make money at all. The main question is: "Are there goods or services related to the subject of your website?" If you write about your family or you add day after day jokes or descriptions of free resources you will not earn much money even if you get plenty of visitors. So make a proof if your website idea is commercial enough prior to start to make a website. Nothing is as frustrating as realizing that you will not earn with your website after it has been created, promoted and begins to get popular.

The third factor is where the visitors come from to your website. Do not think that you can purchase cheap traffic to earn with Google AdSense. The clever method to make money with your website is to get visitors from the search engines. This is a free and stable traffic source that ensure passive income. Your objective should be to get about 90% of the total visitors from the search engines. Sorry, but do not care about returning visitors, as they are "blind" to your ads.

Watch monthly [online income reports](#) reports of the various bloggers and learn from the real examples.

Access useful information about the topic of [Kalamazoo Restaurants](#) - make sure to study the site. The time has come when proper information is really within your reach, use this chance.
