# **Reasons Of That Why 98 % Of Beginners Will Not Earn In The Internet.**

Reasons of that 98 % of beginners will not earn in the Internet. There are many various reasons why the beginner who has come to the Internet to earn money, never will earn them. In this article the most important reasons are considered...

It is a lot of beginners who only were connected yesterday to the Internet, wish many and to earn stably in the Internet. But not always it turns out how it would be desirable.

As a result the beginner cannot earn anything in the Internet, but thus argues on «high themes» that on the Internet it is impossible to earn in general.

There are many various reasons why the beginner who has come to the Internet to earn money, never will earn them. In this article I would like to consider only eight, in my opinion, the most important reasons. So:

The reason ?1: Beginners incorrectly choose a market segment

All faults that the beginner incorrectly chooses a market segment lies on old residents of Internet business for they preach only is unique correct model of construction of Business which consists on sale of various electronic books and managements. In the internet there are many potentially profitable niches in which it is possible to work and normally to earn, thus not to write books everyone there.

In what the main reason, what the beginner starts to work in a wrong segment?

Yes all same electronic books about E-commerce in which earnings are reduced to the simple formula: Has found a niche – has created a site – has created dispatch – has written a book on 20 pages about something – has sold.

The reason ?2: People start to work online with the desire to receive all

The beginner, who has come to the Internet with thoughts of earnings, wishes to receive the free domain, a free hosting, and free promotion. But nothing happens free.

He puts to himself grandiose plans supposedly I wish to earn 5000\$ in a month. But so to do in a root it is impossible. It is necessary to put to yourself attainable aims. For example, this month I wish to earn 10\$, in the following. 20\$ etc. Sharp jump cannot be. If you do not know how to earn 10\$ or 100\$ in a month, you never will earn 5000\$.

Otherwise, if the beginner puts to himself the purpose in 5000\$ in a month, but as a result earns 10\$ he cardinally is disappointed in Earnings on the Internet.

Mine council: Never look at the sizes of earnings. The most important thing is to learn technology of earnings. Only after this you will know, as well as whence I arrive money, you can earn.

There are no big secrets to [real online business](#), the only secret is that the market of [online internet business](#) niche is really tough - more and more people are trying to make money on the Internet.

But this is where EVERYTHING is in your own hands. Right now we live in the world where information quickly enhances the quality of our life.
